

# Why Booking Your Funnel Economy Rights Early Matters

Imagine this...

When people want the best piece of land, like land right next to a main road → the one who books it first always has the advantage, because that land will only become more valuable.

Funnel Economy works the same way.

But instead of land, it's about "keywords" — the words people use to search for things online, like head massage shop, coffee shop near me, or ASMR massage.

Whoever books these keywords first → becomes the "digital landowner" of those words.

---

## The Benefits of Booking Early

1.

### **You Become the True Owner**

When you book a keyword, it is saved in a secure system that no one can change or erase.

That means you don't just "use the word" — you actually "own it."

---

2.

### **You're Ahead of Latecomers**

If, in the future, a business wants to use the same keyword you own → they would have to "ask for permission" from you.

It's like if someone wants to open a shop on your land → they need to rent it from you first.

---

3.

### **You Can Earn Money**

The keyword rights you own can be “leased” to businesses.

- Example: You own Sleep Salon Bangkok → a new shop wants customers to find them → they rent the right from you.
  - You hold the rights → they pay rent → you earn real income.
- 

**4.**

### **Your Name Gets Placed First**

When the world moves into the era where AI gives people answers → the rights that are booked early will carry more weight.

This means your name or brand has a better chance of being chosen first over competitors.

---

### **In Summary**

Booking your Funnel Economy rights early means:

- You truly own something valuable in the digital world.
- You gain an advantage over competitors who haven't started yet.
- You can create income by leasing your rights.
- Your brand has a chance to be chosen first in the AI-driven future.

Simply put → the earlier you book, the bigger your advantage.
